#### WORK ENVIRONMENT APPRENTICE NOTEBOOK

#### **PURPOSE OF NOTEBOOK:**

This notebook helps companies to plan and monitor employee training. It is based on the mentoring method.

#### **WHAT IS MENTORING:**

Mentoring involves learning the trade in the workplace. A person with training or experience in the trade (the mentor) passes on his or her knowledge, work techniques, and industry best practices to a new employee (the apprentice).

#### **USING THE NOTEBOOK:**

Depending on the size of the company and the production environment, the apprentice may not be able to develop certain trade-related skills.

For each competency explained and demonstrated by the mentor:

- Mentors check off INAPPLICABLE when the task cannot or will not be completed by the apprentice.
- 2. Mentors check off **EXPLAINED** when they have explained or demonstrated the task to the apprentice for the 1st time.
- 3. Mentors check off **IN PROGRESS** when they see that their apprentice has improved but has not yet fully mastered the competency.
- 4. Mentors check off **MASTERED** when they observe that their apprentice is capable of performing the task independently and in accordance with company expectations. They enter the date of their assessment.
- 5. Mentors check off **NOT MASTERED** when the task will not be mastered and has been removed from the apprentice's responsibilities.

Mentors should complete the notebook regularly, as the apprenticeship progresses. This ensures that nothing is forgotten, and that the apprentice's progress is monitored. Weekly completion is recommended.

When all competency elements have been mastered (excluding inapplicable or non-mastered elements), mentors enter their initials in the last column of the competency table.

## **TRADE COMPETENCIES TABLE**

| COMPETENCIES                                               |                                                                                             |                                             | Elements inc                                      | luded in the co                                                                    | ompetency                                |                                               |                                             |
